Profile

Experienced **Tech Lead / Software Engineer** with 10+ years of demonstrated history of working in the computer software industry. In possession of diverse **hard** and **soft** skills developed through various projects, internships, and working experience. Professional proficiency in the English & Spanish language needed for a business environment. Ambitious and **motivated** professional with previous **technical experience** and someone that is eager to **learn** and strive to do better everyday.

Experience

- Tech Lead / Software Engineer | adidas
  January 2023 - October 2026 (3 year, 10 months), Madrid, Spain

  Taking the lead of extracting a monolithic codebase and converting it to a monorepo + microservices setup for the adidas frontend experience interacted by millions of people around the world daily. The expertise and trust gained allowed me to step up as the tech lead of the team.

  Last 2 years, acted as Tech Lead for a team of 3 web software developers (full stack) with additional alignment between mobile app and backend teams. Besides leadership tasks, assisted with setting up of agentic workflows and AI integration in the development workflow preparing for the new era of development with AI.

- Software Developer | adidas
  September 2020 - December 2022 (2 year, 4 months), Zaragoza, Spain

  Part of the frontend development team that maintains product listing pages and navigation across the entire adidas ECOM area to make it easier for millions of customers to find exactly what they are looking for.

  Lead the migration of navigation assets to a flexible and secure content management system in order to make it easier and faster for markets to create updates and save up to ~1000 manual hours per year. Consecutively this enables the possibility for markets to execute AB tests on the navigation data worldwide in order to discover more profitable solutions *(first executed test profit outcome: +17.6M/year in EU)*.

  Executing releases as a release manager to make daily releases possible through extensive communication and organization between different teams and stakeholders. Also part of the release team to improve the release deployment pipeline by introducing automation where possible.

- Application Developer | Bouw7
  December 2015 - January 2020 (5 years), Dokkum, The Netherlands

  Bouw7 creates cloud-based software solutions for construction companies. I worked on the creation of the web-based SaaS platform, providing data analysis & visualization and creating 3D solutions with Autodesk software.

  Tasks included:

  - Frontend & Backend Development (HTML, Javascript & CSS) (PHP, Symfony & Yii2 Framework)
  - Continuous Integration & Development (CI/CD, Github Actions, YAML)
  - Server Management & Programming Environment (Linux systems & Docker)

- Data Science Trainee *(internship)* | Seedtag
  February 2020 - June 2020 (5 months), Madrid, Spain

  Development of a contextualization system that classifies Dutch written articles as brand-safe for the placement of advertisements. The research was conducted in the field of machine learning and natural language processing techniques conforming embedding spaces, stemming, and lemmatization.

  Tasks included:

  - Machine Learning & NLP Techniques (Python, Scikit-learn, Tensorflow, Pandas, Matplotlib)
  - Data collection and management (MongoDB)
  - Docker + Kubernetes and CI (Jenkins)

- Engineering Intern *(internship)* | **National Instructors College Abilonino**
  September 2018 - January 2019 (5 months), Lira, Uganda

  A challenging internship where one had to take into account that there is little to no internet accessibility. The main objective of the internship was on-premise (intranet) access to course material, school calendar, shared files for staff and students, and management improvement in administration.

  Tasks included:

  - Teaching programming skills to students
  - Development of two offline systems (Learning Management System & Management Information System)
  - On-premise file-sharing environment (Windows Server)
  - Improving, regulating and monitoring the internet & intranet usage to avoid bandwidth limitations

Education

- Software Engineering | **Hanze University of Applied Sciences**
  BSc. Computer and Information Sciences, Bachelor of Science
  September 2016 - June 2020 (4 years), Groningen, The Netherlands

  Thesis: "Dutch Contextual Brand-safe Analysis" (grade: 8.5)
  Nominated among the top 5 graduates within the major of information technologies.

  Courses: Algorithms & Data Structures, Network Infrastructures, Artificial Intelligence & Machine Learning, Website Development, Project Development, IT Service Management & Security, Data Analysis & Visualization

- Exchange Student | **CEU San Pablo**
  February 2019 - June 2019 (5 months), Madrid, Spain

  Courses: Fundamentals of Marketing, Business Management and Organization II, Economic Theory II, Spanish Course

- Application & Media Developer | **MBO ROC Friese Poort**
  September 2014 - June 2016 (2 years), Leeuwarden, The Netherlands

  Accelerated degree, graduated in 2 years instead of the normal 3-year trajectory

  Courses: Design of Applications, Realization & Documenting Applications, Implementing Applications, Maintaining Applications, Operating Systems

Skills

Technical Skills

- AI Tooling (Claude Code, Agentic Workflows)
- Frontend (React, Vuejs)
- Web Development (HTML, Javascript, CSS3)
- Python
- Algorithms & Data Structures
- Docker, Continuous Integration Tools
- Cloud Services (AWS, Google Cloud)
- Databases (MySQL, MongoDB)

Languages

- Dutch (Native)
- English (Professional Proficiency)
- Spanish (Working Proficiency)

Organizational skills

- Team Leadership and management skills
- Excellent communication skills
- Professional presentation skills
- Documentation & Technical Writing

Honors & Awards

Finalist Skills Heroes Netherlands

One of the finalists of the Skills Heroes 2016

The Skills Heroes is a professional competition for secondary vocational education in The Netherlands. Participants go through various qualification rounds and finally the national finals, participants compete in their field to become the best in the Netherlands.
